## ABOUT PROGRAM

Chromatography is a separation method where the analyte is combined within a liquid or gaseous mobile phase, which is pumped through a stationary phase. Usually one phase is hydrophilic and the other is lipophilic. The components of the analyte interact differently with these two phases. Depending on their polarity they spend more or less time interacting with the stationary phase and are thus retarded to a greater or lesser extent.

Under his chairmanship, the group has made a remarkable stride in the field of education offering several courses in Under Graduate, Post Graduate, Engineering and Pharmacy Programs. This milestone is achieved as the institutions impart quality and career oriented education, countering the challenges of modern world through dedication, determination, prompt execution and innovative ideas of our academic council. Today, Avanthi Educational Society is proud to have a strength of over 16000 students with 15 institutions under its ambit.

## ABOUT PROGRAM

Social relationships are known to affect health and survival to an extent comparable with smoking. Women and men differ in the number and size of different types of social relationships and in the health impacts. Several health-related behaviors are likely to mediate this link for some but not all aspects of a person's social context. Diet is a strong candidate for systematic examination along the pathway between social relationships and health so as to better inform chronic disease prevention and promotion of healthy ageing.

## ABOUT AVANTHI

Avanthi Educational Society started its journey under the eminent Leadership of Sri M. Srinivasa Rao Garu, Member of Parliament, Anakapalli. Under his chairmanship, the group has made a remarkable stride in the field of education offering several courses in Under Graduate, Post Graduate, Engineering and Pharmacy Programs. This milestone is achieved as the institutions impart quality and career oriented education, countering the challenges of modern world through dedication, determination, prompt execution and innovative ideas of our academic council. Today, Avanthi Educational Society is proud to have a strength of over 16000 students with 15 institutions under its ambit.

## ABOUT PROGRAM

Health education to students should necessarily include prevention programs, activities to educate students about sanitary standards, and about hygienic conditions. Teachers should communicate clearly to students in classrooms about topics related to proper nutrition, safe sex, exercise, and healthy relationships. A lack of health education has and will continue to have a profound impact on community healthcare indicators, particularly in low-income nations.
