PREFACE

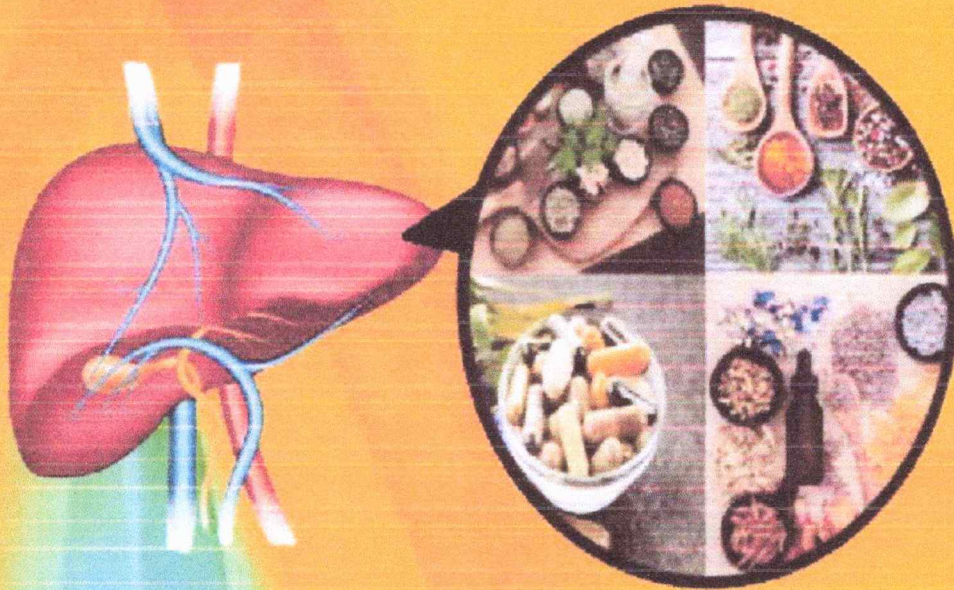

This book is a result of extensive literature survey done by students of pharmacy, and other science fraternity from different colleges all over India. The information in this book is not intended to be a substitute for professional medical advice. Do not use this information to diagnose any disease, also the book should not be used for ayurvedic treatment of any disease. However, the book is published to serve as a guide for people wishing to do research on our indigenous plants which can be used in the treatment of various diseases of kidney.

We are thankful to all the contributors as without their help publishing this book would have not been possible. We wish all our readers knowledgeable and research-oriented reading.

Benzimidazole: Pharmacological Profile

*Mahender Thatikayala, Anil Kumar Garige
and Hemalatha Gadegoni*

Abstract

Benzimidazole is a bicyclic heterocyclic aromatic compound in which benzene fused to imidazole moiety. Benzimidazole holds a vital role in the field of medicinal chemistry which possesses wide variety of pharmacological activities like antibacterial, anti cancer, antifungal, antileishmanial, anti tubercular, anti viral and anti malarial respectively, hence the benzimidazole moiety attracting the medicinal chemist to synthesize the different benzimidazole derivatives with wide variety of pharmacological activities. The book chapter mainly discussed the anti cancer, anti HIV, antileishmanial and anti tubercular activities of recently synthesized benzimidazole derivatives.

Keywords: benzimidazole, anti cancer, anti HIV, antileishmanial, anti tubercular

1. Introduction

Benzimidazole is bicyclic heterocyclic aromatic compound in which benzene ring fused to 4 and 5 position of imidazole ring, it contain two nitrogen atoms at 1 and 3 position exhibit both acidic and basic nature called amphoteric nature and exists in two equivalent tautomeric forms, when the hydrogen present at first position nitrogen atom possess acidic nature, when the hydrogen present at third position nitrogen atom possess basic nature (**Figures 1**) [1]. Benzimidazole is a very important important pharmacophore among all the heterocyclic compounds due to its important pharmacological activities like anti-Alzheimer [2], antibacterial [3], anti cancer [4], anti-diabetic [5], antifungal [6], anti HIV [7], anti leishmanial [8], anti inflammatory [9], analgesic [9], anti malarial [10], anti microbial [11] and anti tubercular [12] activity, there are many benzimidazole derivatives are using to treat many diseases, few presently marketing drugs contain benzimidazole moiety are the bezitramide using as an analgesic, ridinilazole sing as antibacterial, the candesartan, mibefradil using as anti-hypertensive drugs, mebendazole, albendazole, thiabendazole, and flubendazole usng as antihelmintics, astemizole, bilastine using as antihistamines, pantoprazole, lansoprazole, esomeprazole, ilaprazole using as proton pump inhibitors, bendamustine, selumetinib, galeterone, pracinostat using as antitumor agents and envirodine, samatasvir, and maribavir using as antiviral agents (**Figures 2**) [13–17].

ABSTRACT

The prepared blend for IR layer tablets and SR layer tablets also maintained the physiochemical properties of tablets such as thickness, hardness, weight variation, and friability. The optimized formulation F8 in IR formulations contains an average thickness of 2.4mm, an average hardness of 3.4 kg/cm², an average weight of 149mg, friability of 0.43%. The optimized formulation F7 in SR formulations contains an average thickness of 2.3mm, average hardness of 7.3 kg/cm², and friability of 0.41%. The F7 formulation which releases the capecitabine in a sustained manner in 1st hour releases 25.5% but the remaining drug release was sustained up to 12 hours and the ondansetron immediate release F7 formulation showed 96 % drug release within 30 min. With the data of kinetic analysis, the F7 formulation showed the best linearity in Higuchi's Equation plot indicating that the release of the drug from the matrix tablet follows Non-Fickian diffusion.

ABSTRACT

Introdução: The article discusses the general provisions of the feasibility study for the use of dual completion operation on the example of the experience of Turkmenistan, where an experimental test was conducted on four wells of the Northern Goturdepe field located in the coastal zones of the coastal waters of the Caspian Sea. Geological materials and materials of previously drilled wells were used for the design, as well as analysis of hydrodynamic and thermodynamic indicators from the existing well stock. Oil samples were also taken from wells in order to conduct laboratory analyses to fully determine their characteristics. The calculation of the economic efficiency of these four wells was carried out, according to the results of which the economic effect was determined by reducing capital expenditures for drilling and development of a multi-layer field. This work can be used and useful to fulfill the tasks set for the accelerated development of multi-layer deposits, which will eventually lead to a significant reduction in the volume of drilling wells, respectively, and funds.

INTRODUCTION

Controlled release tablets are commonly taken only once or twice daily, compared with counterpart conventional forms that may have to take three or four times daily to achieve the same therapeutic effect. The advantage of administering a single dose of a drug that is released over an extended period of time to maintain a near-constant or uniform blood level of a drug often translates into better patient compliance, as well as enhanced clinical efficacy of the drug for its intended use. The first Controlled release tablets were made by Howard Press in New Jersey in the early 1950's. The first tablets released under his process patent were called 'Nitroglyn' and made under license by Key Corp. in Florida. Controlled release, prolonged release, modified release, extended release or depot formulations are terms used to identify drug delivery systems that are designed to achieve or extend therapeutic effect by continuously releasing medication over an extended period of time after administration of a single dose. The goal in designing Controlled or Controlled delivery systems is to reduce the frequency of the dosing or to increase effectiveness of the drug by localization at the site of action, reducing the dose required or providing uniform drug delivery. So, Controlled release dosage form is a dosage form that release one or more drugs

continuously in predetermined pattern for a fixed period of time, either systemically or to a specified target organ.

Controlled release dosage forms provide a better control of plasma drug levels, less dosage frequency, less side effect, increased efficacy and constant delivery. There are certain considerations for the preparation of extended release formulations:

- If the active compound has a long half-life, it is Controlled on its own,
- If the pharmacological activity of the active is not directly related to its blood levels,
- If the absorption of the drug involves an active transport and
- If the active compound has very short half-life then it would require a large amount of drug to maintain a prolonged effective dose.

The above factors need serious review prior to design. Introduction of matrix tablet as Controlled release (SR) has given a new breakthrough for novel drug delivery system in the field of Pharmaceutical technology. It excludes complex production procedures such as coating and Pelletization during manufacturing and drug release rate from the dosage form is controlled mainly by the type and proportion of polymer used in the preparations. Hydrophilic polymer matrix is

Comparative *in vivo* evaluation of simvastatin after oral and transdermal administration in rabbits

B. Manjula*, V. Rama Mohan Gupta and K. B. Chandra Sekhar

Abstract

Membrane-moderated transdermal systems of Simvastatin liposomes were prepared by incorporating the drug reservoir within a shallow compartment moulded from a drug-impermeable backing membrane and 2% w/v cellulose acetate rate-controlling membrane. The pharmacodynamic and pharmacokinetic performance of Simvastatin following transdermal administration was compared with that of oral administration. This study was carried out in a randomized cross-over design in male New Zealand albino rabbits. The estimation of Simvastatin in plasma was carried out by LC-MS/MS method. The parameters such as maximum plasma concentration (C_{max}), time for peak plasma concentration (t_{max}), mean residence time (MRT) and area under curve (AUC 0 - ∞) were significantly (P < 0.001) differed following transdermal administration compared to oral administration. The relative bioavailability of Simvastatin was increased about nine fold after transdermal administration as compared to oral delivery. This may be due to the avoidance of first pass effect of Simvastatin. The concentration of Simvastatin in plasma was found to be stabilized and maintained in a narrow range over the study period up to 24 hrs for transdermal formulation where as the concentration was decreased rapidly up on oral administration. It was concluded that the relative rate of extensive first pass metabolism was significantly reduced in transdermal administration, resulted in increased relative bioavailability and reduced frequency of administration.

Keywords: Simvastatin, Liposomes, Transdermal Systems, LC-MS/MS, *In vivo* Studies.

Introduction

The transdermal route of drug delivery has gained great interest of pharmaceutical research, as it circumvents number of problems associated with oral route of drug administration. The barrier nature of skin inhibits the penetration of most drugs. The use of lipid vesicles as delivery system for skin treatment has gained attention in recent years(1). Liposomes are microscopic or submicroscopic particles and are concentric bilayered vesicles in which an aqueous volume is entirely enclosed by a membranous lipid bilayer mainly composed of natural or synthetic phospholipids. Liposomes are microscopic vesicles that contain amphiphilic phospholipids arranged in one or more concentric bilayers enclosing an equal number of aqueous compartments. The thermodynamically stable, lamellar structures form spontaneously when a lipid is brought into contact with an aqueous phase(2).

The aim of the present study was to develop and evaluate the potential use of liposome vesicles in the transdermal drug delivery for delivery of Simvastatin. Simvastatin is an effective drug in the treatment of hyperlipidemic patients, simvastatin is a methylated derivative of lovastatin that acts by competitively inhibiting 3-hydroxy-3-methylglutaryl-coenzyme A (HMG-CoA) reductase, the enzyme that catalyzes the rate limiting step in cholesterol biosynthesis. Administration of conventional tablets of simvastatin has been reported to exhibit

(57) Abstract :

SYNTHESIS OF NOVEL ORAL HYPOGLYCEMIC PYRAZOLE COMPOUNDS AND ITS CHARACTERIZATION ABSTRACT The present invention relates to a synthesis of 1-(3,5-dimethyl-1H-pyrazol-1-yl)-2-(4-methylphenoxy) ethanone. Particularly, the present invention relates to a synthesis of pyrazole derivative, comprising formula V-1-(3,5-dimethyl-1H-pyrazol-1-yl)-2-(4-methylphenoxy) ethanone. This synthesized compound was characterized using its melting point, Carbon, Hydrogen and nitrogen percentage. The synthesized pyrazole derivative has excellent oral hypoglycemic activity.

Dear Dr Balaji garu,

Thank you for showing interest to send your Pharmacy students to CCMB. The students may visit our institute on 26 April 2022 at 2:00 pm. The duration of the visit will be about 2 hours. You may plan your visit accordingly.

Best Regards,

B V Ramakrishna

Sub- Request for Institutional visit for our students -regd.

Respected Madam,

Greetings from Avanthi Institute of Pharmaceutical Sciences, I would like to request you to permit our students of II B. Pharm & II Pharm D to visit your reputed institution on a suitable date in this month at your convenience. The objective of the said visit is to enhance the knowledge of students on current developments in the field of pharmaceutical sciences & life sciences and also through an insight on career opportunities. We will be grateful to you for considering the same.

We look forward to your kind response in this regard at the earliest.

Thanking you

With regards,

Dr. K. Balaji,

THE DEVELOPMENT OF A NOVEL STABILITY-INDICATING RP-HPLC METHOD FOR THE SIMULTANEOUS EVALUATION OF RILPIVIRINE AND CABOTEGRAVIR IN PURE API FORM AND TABLET DOSAGE IN ACCORDANCE WITH ICH GUIDELINES

Challamalla Pavani^[a], Dr.V. Jayashree^{[b]*}

Article History: Received: 12.06.2022

Revised: 11.07.2022

Accepted: 08.08.2022

Abstract: This study's focus is on the simultaneous assessment of Rilpivirine and Cabotegravir using RP-HPLC in bulk and tablet dosage form. **Materials and methods:** The separation was carried out on a Zorbax SB C18 (4.6 x 150mm, 5 m) analytical column using a mobile phase of 40% Water (0.1 percent Formic Acid): 60% Acetonitrile. Using a UV detector, the eluents were found at 248.0 nm. **Results:** Under optimal circumstances, Rilpivirine and Cabotegravir were separated at 2.084 and 3.2mins, respectively. The detection limit for Rilpivirine was 1.02µg/mL, while the detection limit for Cabotegravir was 3.30µg/mL. Cabotegravir had a percentage mean recovery of 100.02 percent, but Rilpivirine had a recovery rate of 100.72 percent. **Conclusion:** The percentage of degradation was determined to be extremely low in each stressful environment. It was found that optimized conditions were incredibly ideal for simultaneously determining all of them in both marketing dose form and bulk form.

Keywords: Cabotegravir, Rilpivirine, method development, validation, and RP-HPLC.

INTRODUCTION

A subclass of non-nucleoside reverse transcriptase inhibitors includes Rilpivirine (NNRTIs). A group of HIV integrase inhibitors includes Cabotegravir. ⁽¹⁾ The chemical formula for Rilpivirine is 4-[4-(4-[(E)-2-cyanovinyl]-2, 6-dimethylphenyl) amino] pyrimidine-2-yl]amino}benzonitrile.

Figure 1. Chemical Structure of Rilpivirine

Chemically, Cabotegravir is N-[(2, 4-Difluorophenyl) methyl]-6-hydroxy-3-methyl-5,7-dioxo-2,3,5,7,11,11a-hexahydro(1,3)oxazolo(3,2-a)pyrido(1,2-d)pyrazine-8-carboxamide. For the treatment of human immune deficiency virus type 1 (HIV-1) infection in some individuals, Rilpivirine and Cabotegravir injections are combined. ⁽²⁻⁵⁾ These drugs function by lowering the blood level of HIV. Although Rilpivirine and Cabotegravir do not treat HIV, they may lessen your risk of getting AIDS and other HIV-related conditions such serious infections or cancer. ⁽⁶⁻⁸⁾ Taking these medications, engaging in safer sexual behaviour, and changing other aspects of one's lifestyle may help reduce the risk of spreading the HIV virus to others. Figures 1 and 2 depict the structures of Rilpivirine and Cabotegravir, respectively. ⁽⁹⁻¹¹⁾ By enhancing sensitivity and shortening elution periods, the current research aims to create an ultrafast, stability-indicating RP-HPLC method for the simultaneous quantification of Rilpivirine and Cabotegravir in bulk pharmaceuticals and commercial dosage forms. Additionally, the validation research was completed in accordance with ICH Guidelines Q2 (International Conference on Harmonization) (R1).

ABSTRACT:

In order to measure Glecaprevir & Pibrentasvir in human plasma form, a reverse-phase high performance liquid chromatographic method is described and validated. A 0.1% octane sulphonic acid and acetonitrile mobile phase was optimized in a 25: 75 v/v proportion and showed maximum absorption at 226 nm. In the presence of other components. specificity refers to how well an analytical method differentiates and quantifies the analyte. As a result of a carry-over test, the analyte from the previous injection was confirmed to have not carried over. The Beer's Law range for this method is 25-150 µg/ml and 10-60 µg/ml of Glecaprevir & Pibrentasvir. 0.9999 and 0.9997 are obtained for the linear regression of method. Results obtained by the proposed methods are in good agreement with the human plasma assay forms when analyzed accurately, precisely, and consistently. The statistical validity of the results also confirms the accuracy, precision, and stability of the proposed methods.

Keywords: Glecaprevir & Pibrentasvir, RP-HPLC, statistical validation

Abstract

The concomitant measurement of Tenofovir DF, Lamivudine, and Doravirine in bulk and tablet dose form with UPLC is the subject of this study. The separation was performed using acetonitrile and 0.1% TEA buffer at pH-3 as the mobile phase on an Endoversil, C18, ODS (2.1 50 mm 1.7 m) analytical column. The eluents were identified at 260.0 nm using a PDA detector. Doravirine, Lamivudine, and Tenofovir DF were separated at 0.805, 0.326, and 0.481min, correspondingly, under ideal conditions. Lamivudine had a 0.07µg/mL of detection limit, Tenofovir DF had a detection limit of 0.04 µg/mL, and Doravirine had a detection limit of 0.09 µg/mL. Lamivudine had a percentage mean recovery of 99.68 percent, Tenofovir DF had a percentage mean recovery of 99.55 percent, and Doravirine had a percentage mean recovery of 100.17%. In all of the stressful settings, the percentage of deterioration was found at a very low extent. Optimized conditions were discovered to be exceptionally suitable for determining all of them concurrently in both marketed dose form and bulk form.

Keywords: UPLC; Method development; Validation; Lamivudine; Tenofovir DF; Doravirine

Introduction

Lamivudine is an antiretroviral drug that is used to cure hepatitis B and HIV-1 infections. It operates by interfering with the synthesis of viral DNA. Chemical name of Lamivudine is 4-aminolamivudine. "-1-J(2R, 5S)-2-(hydroxymethyl)-1, 3-oxathioian-5-yl] pyrimidin-2-one dihydropyrimidin-2-one dihydropyrimidin-2-one dihydropyr" (1, 2-dihydropyrimidin-2-one) [1]. Gilead Sciences sells the tenofovir prodrug disoproxil fumarate under the trade

name Viread. It belongs to the nucleotide analog reverse transcriptase inhibitors family of antiretroviral medicines. Hepatitis B and HIV may be treated with this drug in combination with other medicines [2]. Doravirine is a non-nucleoside reverse transcriptase inhibitor therapeutic option for HIV-1 ("Human immunodeficiency virus type 1") virus in adult individuals who have never undergone antiretroviral treatment, increasing the treatment choices for HIV-1 [3,4]. DELSTRIGO, a Doravirine, Lamivudine, and Tenofovir Disoproxil Fumarate combination, was approved by the FDA in August 2018. It's designed to be used as a total treatment for HIV-1 infection in individuals who have never had antiretroviral medication before [5]. A thorough review of the literature finds that no UV spectrophotometric methods have been described; however, LC-MS/MS bioanalytical methods are available. There was no mention of the combination of these three antivirals in any pharmacopeia. In the literature, there were only a few HPLC and a single UPLC method that could simultaneously estimate the current combination [6-9]. All of the mentioned HPLC methods had longer retention times and had additional sensitivity issues, such as Kokkirela et al., Tenofovir DF was eluted in less than four minutes using acetonitrile/phosphate buffer as the mobile phase. According to the ICH criteria, Gowri et al. found up to 33.8 percent degradation using n-hexane as a mobile phase. To elute Doravirine, an HPLC procedure described by Tiruveedhi et al. took as much as 8.16 minutes to complete. Even though all of the analytes' quantitation limits were high, there were some sensitivity concerns. The only method disclosed was Addanki et al. UPLC method, the mobile phase was potassium

ABOUT AVANTHI

Avanthi Educational Society started its journey under the eminent Leadership of Sri M. Srinivasa Rao Garu, Member of Parliament, Anakapalli. Under his chairmanship, the group has made a remarkable stride in the field of education offering several courses in Under Graduate, Post Graduate, Engineering and Pharmacy Programs. This milestone is achieved as the institutions impart quality and career oriented education, countering the challenges of modern world through dedication, determination, prompt execution and innovative ideas of our academic council. Today, Avanthi Educational Society is proud to have a strength of over 16000 students with 15 institutions under its ambit.

ABOUT PROGRAM

Methodology plays a significant role to shape the nature and process of research and its outcomes. The course will focus on theoretical and practical inputs on different stages of research that expose the scholars to relevant for quantitative and qualitative traditions. The present workshop will help to address various research issues and enrich the scholars in social sciences on research methodology. This workshop on data analysis can help to provide insights for high impact research especially for the researchers in social sciences. A real-world example will be used to illustrate concepts/methods and highlight common challenges associated with designing and implementing research methods with eminent subject matter experts.

ABOUT PROGRAM

Research papers are similar to academic essays, but they are usually longer and more detailed assignments, designed to assess not only your writing skills but also your skills in scholarly research. Writing a research paper requires you to demonstrate a strong knowledge of your topic, engage with a variety of sources, and make an original contribution to the debate.

ABOUT PROGRAM

Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times. Medicinal plants are widely used as folk medicine in non-industrialized societies, mainly because they are readily available and cheaper than modern medicines. Medicinal plants are used with the intention of maintaining health, to be administered for a specific condition, or both, whether in modern medicine or in traditional medicine

ABOUT PROGRAM

Social relationships are known to affect health and survival to an extent comparable with smoking. Women and men differ in the number and size of different types of social relationships and in the health impacts. Several health-related behaviors are likely to mediate this link for some but not all aspects of a person's social context. Diet is a strong candidate for systematic examination along the pathway between social relationships and health so as to better inform chronic disease prevention and promotion of healthy ageing.

ABOUT PROGRAM

Health education to students should necessarily include prevention programs, activities to educate students about sanitary standards, and about hygienic conditions. Teachers should communicate clearly to students in classrooms about topics related to proper nutrition, safe sex, exercise, and healthy relationships. A lack of health education has and will continue to have a profound impact on community healthcare indicators, particularly in low-income nations.

This is to certify that Mr/Mrs/Miss: Kalyan Sathish (18GN2R0052)
of Avanthi Institute of pharmaceutical Sciences..... for successfully
completing the course on Handling of Instruments (Analytical)
for the period of One Week at **ZENRISE**, Hyderabad.

CEO

ABOUT AVANTHI

Avanthi Educational Society started its journey under the eminent Leadership of Sri M. Srinivasa Rao Garu, Member of Parliament, Anakapalli. Under his chairmanship, the group has made a remarkable stride in the field of education offering several courses in Under Graduate, Post Graduate, Engineering and Pharmacy Programs. This milestone is achieved as the institutions impart quality and career oriented education, countering the challenges of modern world through dedication, determination, prompt execution and innovative ideas of our academic council. Today, Avanthi Educational Society is proud to have a strength of over 16000 students with 15 institutions under its ambit.

ABOUT PROGRAM

Chromatography is a separation method where the analyte is combined within a liquid or gaseous mobile phase, which is pumped through a stationary phase. Usually one phase is hydrophilic and the other is lipophilic. The components of the analyte interact differently with these two phases. Depending on their polarity they spend more or less time interacting with the stationary phase and are thus retarded to a greater or lesser extent.

ABOUT PROGRAM

Green chemistry (sometimes referred to as sustainable chemistry) is the branch of chemistry that deals with the design and optimization of processes and products in order to lower, or remove altogether, the production and use of toxic substances. Green chemistry is not the same as environmental chemistry.

ABOUT PROGRAM

The word health refers to a state of complete emotional, mental, and physical well-being. Healthcare exists to help people stay well in these key areas of life. Health and first aid plays important role in life. When you provide. Basic medical care to someone experiencing a sudden injury or illness, it's known as first aid. When faced with unexpected medical emergencies, the absence of immediate aid presents significant challenges, potentially leading to severe consequences. This emphasizes the crucial role of timely First Aid, which has the potential to save many lives. Thus, understanding the Importance of First Aid can help you deal with critical situations effectively.

 Address of Applicant :PHD. RESEARCH SCHOLAR, DEPARTMENT OF PHARMACEUTICAL SCIENCE, GURU GHASIDAS CENTRAL UNIVERSITY, KONI, BILASPUR - 495009, CHHATTISGARH, INDIA BILASPUR -----
4)Mr. KAILASH KUMAR SAHOO
 Address of Applicant :ASSITANT PROFESSOR, DEPARTMENT OF PHARMACEUTICS, DR. C.V RAMAN UNIVERSITY KARGI ROAD KOTA, BILASPUR - 495113, CHHATTISGARH, INDIA BILASPUR -----
5)Dr.SANJAY KUMAR UPADHYAY
 Address of Applicant :ASSITANT PROFESSOR/APPLIED SCIENCES (CHEMISTRY) , RBS ENGINEERING TECHNICAL CAMPUS,BICHPUR,AGRA-283105 AGRA -----
6)SHAHEEN ANSARI
 Address of Applicant :ASSISTANT PROFESSOR PHARMACY JIT COLLEGE OF PHARMACY BARABANKI 225203 BARABANKI -----
7)AHTESHAM AHMAD
 Address of Applicant :ASSISTANT PROFESSOR, BABU SUNDER SINGH COLLEGE OF PHARMACY, LUCKNOW LUCKNOW -----
8)Dr. NIRAJ GUPTA
 Address of Applicant :ASSOCIATE PROFESSOR, COLLEGE OF PHARMACY AGRA, U.P., 282001, DR. A.P.J. ABDUL KALAM TECHNICAL UNIVERSITY, LUCKNOW, UTTAR PRADESH AGRA -----
9)Dr. PUTTA RAJESH KUMAR
 Address of Applicant :PROFESSOR AND HEAD, 0DEPARTMENT OF PHARMACEUTICS, BHASKAR PHARMACY COLLEGE, HYDERABAD, DEPARTMENT OF PHARMACEUTICS, MOINABAD, HYDERABAD, 500075 HYDERABAD -----
10)Dr.KUMARA SWAMY JELLA
 Address of Applicant :ASSOCIATE PROFESSOR, CHAITANYA (DEEMED TO BE UNIVERSITY), HANAMKONDA HANAMKONDA -----
11)Dr. NIRANJAN PANDA
 Address of Applicant :PROFESSOR AND HEAD, DEPARTMENT OF PHARMACEUTICS, ANWARUL ULOOM COLLEGE OF PHARMACY, NEWMALLEPALLY, HYDERABAD-500001 HYDERABAD -----
12)SATYABRATA JENA
 Address of Applicant :ASSOCIATE PROFESSOR, BHASKAR PHARMACY COLLEGE, HYDERABAD, DEPARTMENT OF PHARMACEUTICS, MOINABAD, HYDERABAD, 500075 HYDERABAD -----

(57) Abstract :
 Systematic approach to study the various Nanoparticle Formulations that can be delivered directly to Treat the Cancerous Nodes is the proposed invention. The invention aims at understanding the various nano particles that are used in formulating topical drug molecules. The proposed invention focuses on treating the cancerous nodes by directly delivering the topical drugs to those cancer cells and understanding the efficacy of nano particles.
