Course Outcomes (CO) and CO-PO/PSO mapping

Course Outcomes are the statements which describe the student should be able to do at the end of a course. The most important aspect of a CO is that it should be observable and measurable.

CO-PO/PSO Mapping

It creates link between the Course Outcomes (CO) and program outcomes(PO), Program specific Outcomes (PSO) for each unit and assessment is called CO-PO/PSO Mapping. After CO statements are developed by the course coordinator, CO will map with any possible POs or PSO based on the relationship exist between them. But the POs are not necessarily mapped with any one CO and it may be left blank.

Levels of CO-PO/PSO mapping:

It indicates to what extent a certain component (either assessment method to CO or CO to PO or PO to PEO & PSO).

- 3 indicates substantial (high) mapping (high contribution towards attainment)
- 2 indicates moderate (medium) mapping (medium contribution towards attainment)
- 1 indicates slight (low) mapping (some contribution towards attainment)
- indicates No mapping (No contribution towards attainment)

For B Pharmacy program, 8 semesters are designed according to PCI and University curriculum For each semester, B Pharm HOD consolidates the COs of the respective semester and maintains the documentation of the CO-PO/PSO mapping

CO Assesment and Attainment Process:

Committed to Excellence in Pharmaceutical Education

Avanthi's Institute of Pharmaceutical Sciences
 Gunthapally (V), Hayath Nagar (M),
 Ranga Reddy Dist.

Direct attainment of Cos is determined from the performance of students in Semester Internal Examination (SIE) and Semester External Examination (SEE). The proportional weightages of SIE:SEE set in the ratio 40:60 for both University and Non University examinations.

Co Assesment for University Examinations

Internal Assesment

External Assesment

Co Assesment for Non- University Examinations

Internal Assesment External Assesment

For each theory course, there are two internal examinations and the division of Cos is listed below:

Theory Course	Units	Co described
I Mid Examination -	Unit -I	CO1
	Unit -II	CO2
	Unit -III(Half)	CO2
Mid Examination -II	Unit -III(Half)	CO3
	Unit -IV	CO3
	Unit -V	CO4

- For each practical course , there are two internal examinations and the division of Cos is listed as below.

Practical Course	CO described
Mid Examination -I	CO1

- Course assesment process starts with the marks secured by the students from internal and external examination. The CO attainment levels are measured based on the results of the average of the internal examinations and semester end examination conducted by the university or the college.
- The finalized CO-PO articulation matrix was taken and set Attainment level (Target) for each course. The Target will be fixed by considering the class average marks obtained in semester examination of previous batch or analyzing the nature of the course by distinguishing whether it belongs to Analytical / Theory / Problematic course or Targets are approximately given into certain levels.
- If a course is newly introduced in the curriculum, then the Target will be fixed as 60% by the concern faculty handling the course. Each CO is assessed with the tools chosen by the course coordinators. Each tool will repeat the scores secured by the individual student and the attainment level for each CO is calculated by measuring the percentage of students scored equal or more than the Target fixed for that course.
- **For measuring the attainments of COs of a theory or practical course, the targets for the attainment are fixed as indicated below:**

Course	Target
Theory Internal Examinations	
Subjective (20 M)	75% of maximum marks (15 marks out of 20)
Objective (10M)	75% of maximum marks (7.5 marks out of 10)
Continuous Mode (10M)	75% of maximum marks (7.5 marks out of 10)
Practical Internal Examinations	
Lab Internal Exam	75% of maximum marks (7.5 marks out of 10)
Continuous Mode (5M)	75% of maximum marks (3.75 marks out of 5)
External Examination	
Both Theory and Lab Courses	Grade weightage (10) obtained subject to a minimum of 60%
Project	75% of maximum marks (112.5 marks out of 150)

The attainment levels are set as given below

Attainment Level	Theory Subjects	Practical Subjects
Level 1	0-69 % of students scored the set attainment level	0-69 % of students scored the set attainment level
Level 2	70-79 % of students scored the set attainment level	70-79 % of students scored the set attainment level
Level 3	>=80 % of students scored the set attainment level	>=80 % of students scored the set attainment level

- As per the regulation PCI, the normalization percentage will be considered for measuring the final attainment of each COs of a course. For theory courses 25% of internal and 85% of External assesment will be calculated. For Laboratory courses 40% of internal and 60% of External assesment wil be calculated.
- The CO attainment for the course will be calculated by taking the average of all CO's final attainment value. If the Final Attainment of the course outcomes are equal to the target, then all the course outcomes are attained. If a course failed to attain the set attainment target, then action to be taken for continuous improvement will be suggested by the course handling faculty.

PO/PSO Assesment and Attainment process:

Program outcomes are narrower statements that describe what students are expected to be able to do by the time of graduation. POs are expected to be aligned closely with Graduate Attributes. Programme Specific Outcomes are what the students should be able to do at the time of graduation with reference to a specific discipline.

Direct Method:

Once the overall attainment percentage of each COs is calculated, the PO and PSO attainment is calculated by taking the cumulative average of all the course's CO attainment which contributes to the specific Program Outcomes. The overall CO attainment values are calculated for all the direct assesment tools. For Theory and practical courses,

$$\text{Overall CO attainment} = 0.25 * \text{Internal Exams attainment} + 0.75 * \text{External Exams attainments}$$

Indirect method:

Indirect methods such as surveys and interviews ask the stakeholders to reflect on student learning. They assess opinions or thoughts about the graduate's knowledge or skills and their valued contributions to different stakeholders. An indirect assessment is used to measure certain implicit qualities of student learning, such as values, perceptions and attitudes from variety of perspectives. The stakeholders include students, alumni, faculty, employers and parents.

$$\text{Indirect PO Attainment} = 80\% \text{ of program Exit Feedback} + 10\% \text{ of Alumni Feedback} + 10\% \text{ of Employer Feedback}$$

Committed to Excellence in Education

Overall Attainment of PO

Overall PO attainment=80% of Direct PO Attainment + 20% of Indirect PO Attainment

- The obtained values will be compared with the set attainment target fixed for each PO and PSO. If the target is achieved, then the same process will be continued for further batches. If the target is not achieved, then continuous improvement action will be taken for each PO and PSO.
- Continuous improvement action includes Action to be taken for improving the teaching learning process based on the attainment gap or by improving learning facilities or organizing programs to fill the attainment gap.
