ABOUT THE COURSE

Computer-aided drug design (CADD) includes finding, developing and analyzing medicines and related biological active compounds by computer methodologies. The use of CADD methodologies speeds up the early stages of chemical development while guiding and speeding up drug discovery.

COURSE OBJECTIVES

The objectives of a Computer Aided Drug Design add-on course may include:

1. To introduce students to the fundamentals of Computer Aided Drug Design and its applications in Computational chemistry.
2. To provide students with an understanding of the drug design.
3. To develop students' ability to design, analyze, and implement the computer aided drug design and priority of drug design in drug discovery.
4. To improve students' research oriented skills, including their ability to plan and design the new active drug molecules.

EXPECTED OUTCOMES

1. Gain an understanding of the fundamentals of Computer Aided Drug Design and its applications in Computational chemistry.
2. Develop proficiency in using computer aided drug design to find the problems of research in society.
3. Acquire skills to develop new drug development of active pharmaceutical ingredient and new drugs for society.
4. Develop an appreciation for the importance of computational chemistry geometry and its role in drug development and pharmacy.
5. By meeting these expectations, students who complete the Computer Aided Drug Design add-on course will have a strong foundation in the field of computational chemistry and be well-prepared for further study and careers in Computational chemistry and Pharmacy.

ABOUT THE COURSE

Communication and personality development is one of the most important aspects of any relationship. It can make you more confident, as well as understanding, and compassionate. When you listen to other people and share your thoughts and ideas, it's a way of showing them that you care about what they have to say.

COURSE OBJECTIVES

The objectives of a Communication and personality development add-on course may include:

1. To introduce students to the fundamentals of Communication and personality development.
2. To provide students with an understanding of the communication and behavior, response to an internal or external stimulus.
3. To develop students' ability to adopt socialization, to improve the maturity levels.
4. To improve students communication skills, including their ability to adopt the situation.

EXPECTED OUTCOMES

1. Gain an understanding of the fundamentals of Communication and personality development.
2. Develop proficiency in using Communication and personality development, improve the self-confidence levels and improve the problem solving capacity.
3. Acquire skills to develop new drug development of active pharmaceutical ingredient and new drugs for society.
4. Develop an appreciation for the importance of communication and personality development in the society.
5. By meeting these expectations, students who complete the Communication and personality development add-on course will have a strong foundation in the field of communication and be well-prepared for further study and careers with problem solving capacity.
