our Educational E-Governing has been designed to cover the in depth functionalities of Institute, from the perspective of various users carrying different roles and responsibilities such as Management, Principal, faculty, staff, students, Parents, Alumni etc.

All the data is managed in a time sensitive manner along with the rules and policies applicable at that time, so whenever required, the exact information can be re- produced as it is.

In our Institute Implementation of e-governance operation infollowing areas

1. Planning and Development

2. Administration

3. Finance and Accounts

Planning and Development

E-Governance for planning and development is information system software that integrates departments and functions across an organization into one computer system. This runs on a single database, enabling various departments to share information and communicate with each other' The systems comprise function specific modules, designed to interact with the other modules.

Internet .

Students and faculty have access to e-mail and internet. Most of the data on admission, course allocation, timetable, course evaluation and practice activities are computerized. Administrative activities such as accounting, purchase etc. are also computerized for swift execution of tasks and for instant availability, on the net' of the information needed by administrative officers. Most of the software needed for all this is installed.

.1.T. resources, databases and functional facilitation have been established, and are accessible as per needs. Faculties have access to Intranet and internet to augment their teaching and for the staff to carryon their work.

The teachers havee-repositoriesinthedepartments to store their material
